

Federal Communications Commission

§ 80.55

must request a modification of the station license.

(c) Control points not collocated with station records and dispatch points may be installed and used without obtaining any authorization from the Commission.

§80.43 Equipment acceptable for licensing.

Transmitters listed in §80.203 must be type accepted for a particular use by the Commission based upon technical requirements contained in subparts E and F of this part.

§80.45 Frequencies.

When an application is submitted on FCC Form 503, the applicant must propose frequencies to be used by the station. The applicant must ensure that frequencies requested are consistent with the applicant's eligibility, the proposed class of station operation and the frequencies available for assignment as contained in subpart H of this part.

§80.47 Operation during emergency.

A station may be used for emergency communications when normal communication facilities are disrupted. The Commission may order the discontinuance of any such emergency communication service.

§80.49 Time in which station is placed in operation.

This section applies to public coast and public fixed stations. When a new license has been issued or additional operating frequencies have been authorized, if the station or frequencies authorized have not been placed in operation within eight months from the date of the grant, the authorization becomes invalid and must be returned to the Commission for cancellation.

§80.51 Ship earth station licensing.

(a) In cases where a ship earth station is required to be commissioned before it is certified to use a privately owned satellite system, FCC Form 506 must be submitted to the Commission prior to transmission on any of the satellite frequency bands allocated for maritime satellite communications.

(b) A ship earth station authorized to operate the INMARSAT space segment must display the Commission license in conjunction with the commissioning certificate issued by the INMARSAT Organization. Ship earth stations that were operating in the MARISAT system and are not commissioned by the INMARSAT Organization will continue to be used in the INMARSAT system without a commissioning certificate issued by the INMARSAT Organization. The continued use of such equipment, however, will not be permitted after September 1, 1991, unless a commissioning certificate is obtained from the INMARSAT Organization. Notwithstanding the requirements in this paragraph, ship earth stations can operate in the INMARSAT space segment without an INMARSAT issued commissioning certificate provided an appropriate written approval is obtained from the INMARSAT Organization in addition to the Commission's license.

§80.53 Application for a portable ship station license.

(a) The Commission may grant a license permitting operation of a portable ship station aboard different vessels of the United States. Each application for a portable ship station must include a showing that:

(1) The station will be operated as an established class of station on board ship, and

(2) A station license for portable equipment is necessary to eliminate frequent application to operate a ship station on board different vessels.

(b) [Reserved]

§80.54 Automated Maritime Telecommunications System (AMTS)—System Licensing.

AMTS licensees will be issued blanket authority for a system of coast stations and mobile units (subscribers). AMTS applicants will specify the maximum number of mobile units to be placed in operation during the license period.

[56 FR 3783, Jan. 31, 1991]

§80.55 Application for a fleet station license.

(a) An applicant may apply for licenses for two or more radiotelephone
